

KSH CONSTRUCTION

EST. 2009 · SAN DIEGO

SELECTED WORKS

# Timeless Luxury, Masterfully Crafted.

*A B O U T   ·   C o m p a n y   H i s t o r y*

Establish in 2009 - Almost 20 years of Excellence

Has grown steadily into a team of nearly 20 dedicated professionals.  
In-Hosue team of Management, Carpenters, and Electricians

A vetted network of subcontractors and suppliers who share our standards

KSH Construction is a San Diego-based luxury general contractor specializing in custom new builds and high-end whole-home remodels — from Coronado to Rancho Santa Fe, La Jolla to La Mesa.

We love projects that demand a high level of detail, creativity, and problem solving.

Our Ethos - Integrity, Quality, Craftsmanship

# Kyle Harrell - Professionally

Graduated from SDSU with a degree in Economics

Worked for a residential and a commercial GC while attending school full time

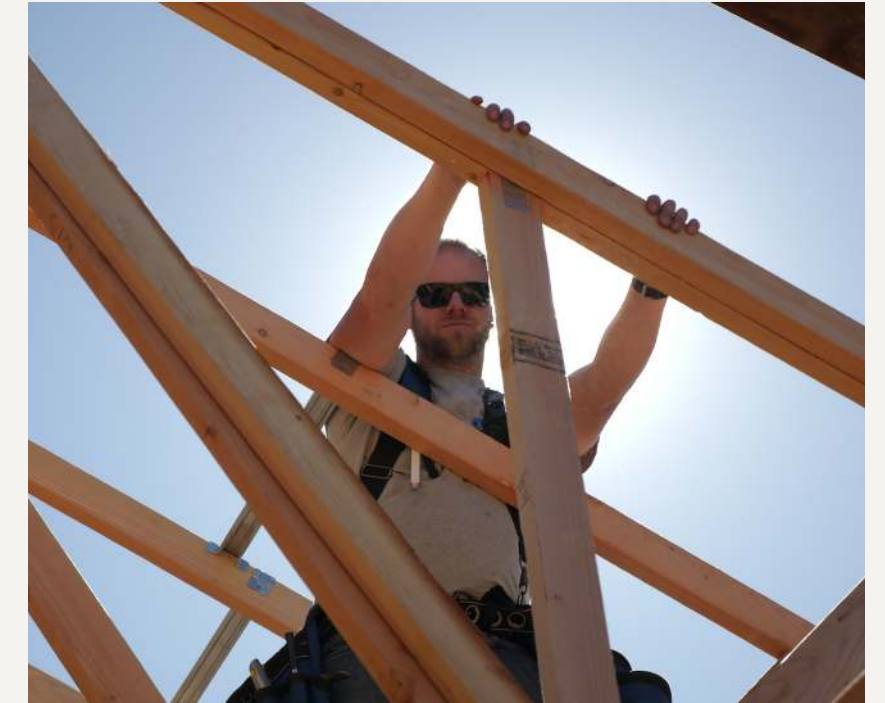

Worked his way up from a new hire to carpenter, to team lead, to site supervisor

Took his experience from repairing bad construction and wanted to build things better

Developed deep expertise in construction knowlege and building science

Always seeking to understand not just HOW things are built but WHY

Professional Philosophy - Good leadership is surrounding yourself with people who are skilled, trustworthy, and passionate about their craft - and then giving them the tools and culture to do their best work.

# Kyle Harrell - Personally

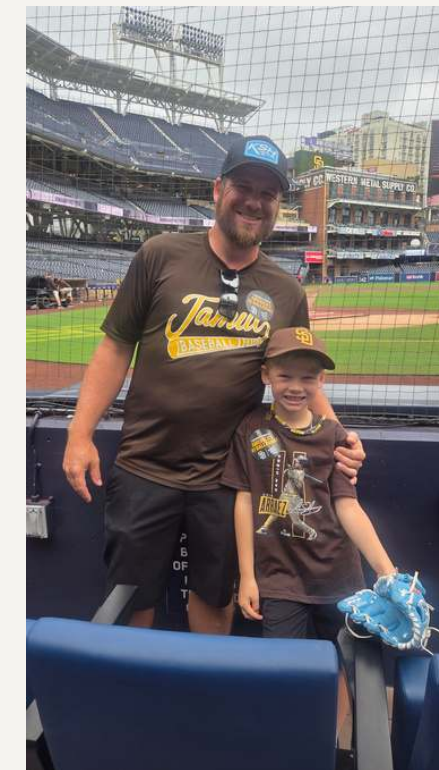

Loving Family of 5 - Sara, McKenzie (12), Riley (9), and Connor (7)

Coach Soccer & Baseball - Commissioner for Soccer, Safety office for Baseball

Volunteer at the kids school for events and our church

Enjoys playing soccer, flag football, and baseball/softball

Recent vacations have been exploring national parks in the South West - (Nevada, Utah, Arizona)

# PROJECT MANAGER

Oversees all aspects of a construction project ensuring successful execution.

Responsible for project planning, overall scheduling, coordination, managing budgets, and overseeing subcontractors and suppliers.

During pre-construction they dive deep into the plans looking for any issues or concerns that could arise. Develop the scope of work, trade estimates, and quantity take-offs with estimation team.

They monitor project progress, resolve any issues or challenges that arise, and ensure quality standards are maintained.

Plays a critical role in delivering projects on time, within budget, and to the highest level of quality.

# SITE SUPERVISOR

Oversees the on-site construction and day-to-day needs of the jobsite.

Responsible for coordinating and supervising of the KSH crew and subcontractors, monitoring construction progress, and ensuring adherence to project plans and specifications.

Must maintain a safe working environment by conducting site inspections and addressing any quality issues or deviations from the plans.

Work closely with the project team to ensure timely completion of the project while upholding the highest standards of quality, efficiency, and safety.

Lead site walks with the project team to update on progress, work through any issues that arise as construction progresses, and provide a plan of action if changes are required.

Maintain a positive relationship with the project team, all trades, suppliers, and building inspectors.

# PROJECT COORDINATOR

Your personal concierge for your construction project.

Oversees project communication and is the primary point of contact for the Client and Project Team.

Responsible for handling RFI's, material orders/deliveries, and all of the day to day communication that needs timely replies. Follow up on items daily to ensure timely responses.

Help new clients get set up on JobTread and provide tech support as needed.

Take meeting notes for site walks, send out meeting summaries with call to actions, and send out weekly email updates with project summary, upcoming schedule, and any outstanding call to action items.

# IN-HOUSE KSH CREW CARPENTERS & ELECTRICIANS

Our in house team of Carpenters and Electricians help give us quality control over the project from start to finish.

Our carpenters are cross trained across all portions of carpentry for their first couple of years then focus on specific trades based on their skill level and preference.

Our carpenters take part in forming the foundation, framing the walls and roof structure, and installing finishes. By starting and finishing the project they have a built in desire to make sure that everything is done correctly through all phases of the project. We also have a consistent presense on site and more eyes than just the site super checking and double checking everything at all phases.

Our electricians handle the power needs and lighting through out. They tend to work closely with the design team during layout.

# PRE-CONSTRUCTION

*Every project we build begins the same way: We want to get to know YOU!*

*We listen carefully to what you want — and then we make sure that's exactly what you get.*

## IMPORTANCE OF PLANNING

*Successful construction projects require thorough planning. Being able to collaboratively plan with the Project Team and sequence out all phases of the project is priceless for the overall build.*

*This gives us the opportunity to dive deep into the details, break down the project into all the small tasks that need to be completed and evaluate the materials and systems needed to be successful. This allows us to take a proactive approach instead of a reactive approach.*

01

### **We plan it all before we start.**

We collect all of the project documents, construction plans, and design schematics then break all of the info down.

02

### **Build out the scope of work**

We create the overall scope of work with the details and create the game plan to success.

03

### **Price out the project**

We work with our in house crews, trade partners, nad suppliers to price out your project and break it out into relevant “buckets” so you can see where your money is going.

04

### **Develop the initial schedule**

Our team buulds out the initial schedule so we can establish the critical path and see who is the cornerstones to timely completion

05

### **List out the To-Dos**

We build out our checklist of To-Do’s broken out by trade and major milestones, these items are tied to the schedule for timely completion.

06

### **Create the proposal**

With all this info, we assemble it together and write out your detailed scope of work, pricing, and contract language so we can get the paperwork out of the way and construction can begin.

07

### **Final organization for the Site Super to begin**

We assemble all of this info into our Construction management software - JobTread and make sure it is triple checked for our Site Super to take over and the project can begin!

# CONSTRUCTION

*With Pre-construction completed, its time to get to work.*

*Our team schedules our project kick off meeting where we meet on site, walk the project with our Phase 1 trades, set up our site security and protection, and get started.*

*Our Site Super takes the lead as the boots on the ground supervision working with the Project Manager to make sure the project is on schedule and budget while planning ahead to keep it that way.*

*Our in house team works with our trade partners to get the job done to our standards staying true to the design and plans.*

# You'll never *wonder* what's happening.

*From the day we break ground to the day you get your keys, you're always in the loop. That's not a promise — it's how we're built.*

## 01    **Information at your fingertips**

Your entire project lives in Job Tread before a nail is driven — timelines, selections, financials. You see the full picture from day one, not partway through.

## 02    **A Site Supervisor on your site, every day.**

Your Site Supervisor manages the crew on the ground daily — holding the standard, coordinating trades, making sure the work matches what you chose.

## 03    **Your Project Coordinator. Always.**

One person whose entire job is you. From your first conversation to your final walkthrough — one call, one name, one person who knows your project inside and out.

## 04    **Weekly Look-Ahead**

Each week your Project Coordinator sends a written update — what's done, what's coming, and anything that needs your input. No surprises. No catching up.

## 05    **Financial questions? We have someone for that.**

Our in-house accounting team can walk you through any number, any time. No runaround. Just clear answers.

## 06    **Done means done.**

The project isn't complete until it matches exactly what you planned — not close, not "good enough." We walk through every finish together before we hand over the keys.

*Whatever you and your designer created together, we build it. That's the job.*

# SITE SAFETY & SECURITY

*We pride ourselves on how we treat our employees and we plan to treat your home the same way.*

*At KSH, safety of our people is a non-negotiable commitment that reflects the same care and attention we bring to our work.*

*We protect our team by providing proper PPE (personal protective equipment), investing in well-maintained tools and machinery, and conducting scheduled inspections of all safety equipment. Mandatory safety training is woven into our culture. Daily site inspections, toolbox talks, and incident logs keeps safety top of the mind for our team.*

*Employees are required to pass a training regiment and obtain certifications for advancement.*

*We voluntarily partner with our works comp insurance provider who provides quarterly safety classes for our whole team and a 3<sup>rd</sup> party inspector to review our jobsites every 6 months for any compliance issues or ways to improve on-site safety. Needless to say, we are one of their highest rated contractors.*

## *Site Security*

*Our team secures the perimeter with construction fencing and privacy screens, making sure all access gates are locked and secured.*

*Remote access security cameras and flood lights are set up inside of the perimeter fence as a deterrent for trespassers.*

*Valuable materials are stored in on-site containers, locked, and even barricaded with equipment when feasible.*

*Electronic lockboxes are used to track key access.*

*All combinations are changed on the first of the month.*

*We maintain good relationships with neighbors, doing our best to take care of them so they can help keep an eye out as well if anything seems out of place while the site is locked up.*

# Project Closet Out & Warranty

*We made it to the finish line!!!*

*When a project reaches substantial completion where all the major parts are completed, our team dedicates a day to go through and assemble the punch list. We go through the house from top to bottom, making note of anything requiring touch ups or adjustments. Our goal is to get the house as perfect as possible before we hand the keys over.*

*Once the punchlist is assembled, we coordinate with our trades to get them in and out as cleanly as possible.*

*With a final walk through for approval, we happily hand the keys over for you to begin to enjoy your new home.*

*Now as much as we like to say we are perfect, we are not and things will happen that need attention.*

*Your newly completed home will need to go through a complete “thermal cycle” and experience the cold of winter, the wet of spring, and the heat of summer. This will allow all the new materials to move and settle. At the end of the first 12 months, we will walk the home again and take note of any areas that require repair - typically this is minor caulking and painting touch ups and adjustment of some cabinet doors or hardware.*

*If anything major happens along the way, we are a simple phone call away to come out and get it handled.*

*If you are wondering if you are on your own after the warranty period, dont fret. We offer our Home Care service for all of our previous clients where we can help with the home’s mainteance for the life of the home.*

PROJECT I — FEATURED

# Coronado *Skyline View*

WHOLE-HOME REMODEL

CORONADO, CA

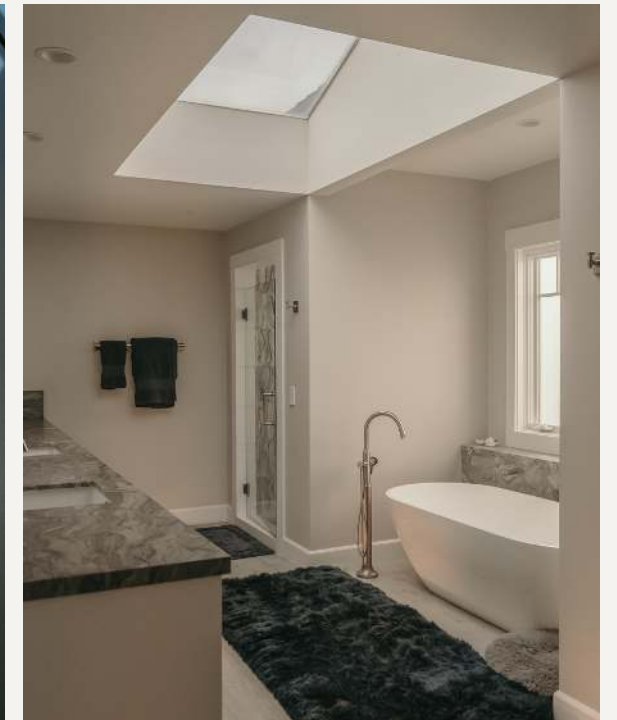

PROJECT I · SELECTED VIEWS

CORONADO, CA

# Coronado *Skyline View*

A complete transformation of a waterfront home, reimagined around an open great room anchored by a marble-topped island and exposed reclaimed beams overhead. The project involved significant structural work — reopening the main living span, re-routing mechanicals, and rebuilding the kitchen and living volumes as one continuous architectural gesture. Executed in close collaboration with the client's architect and interior designer; framing, finish carpentry, and electrical all carried by the in-house KSH crew on a single schedule.

PROJECT II — FEATURED

CORONADO, CA

# Coronado *Cottage*

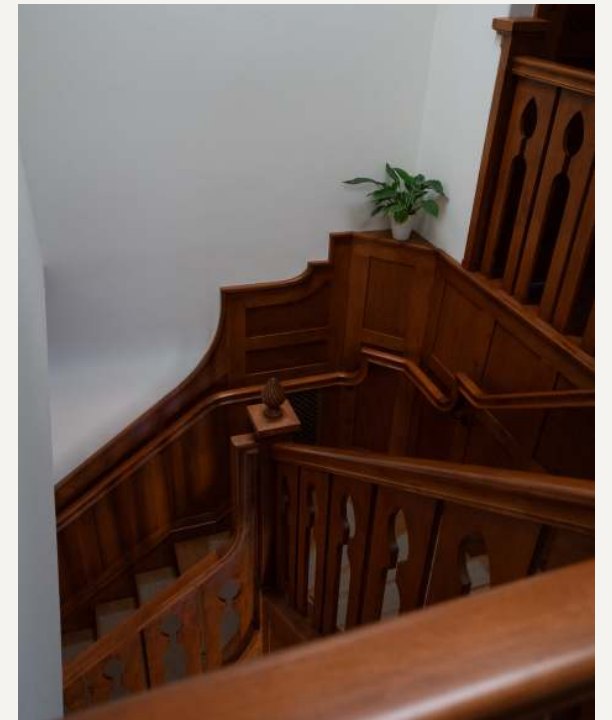

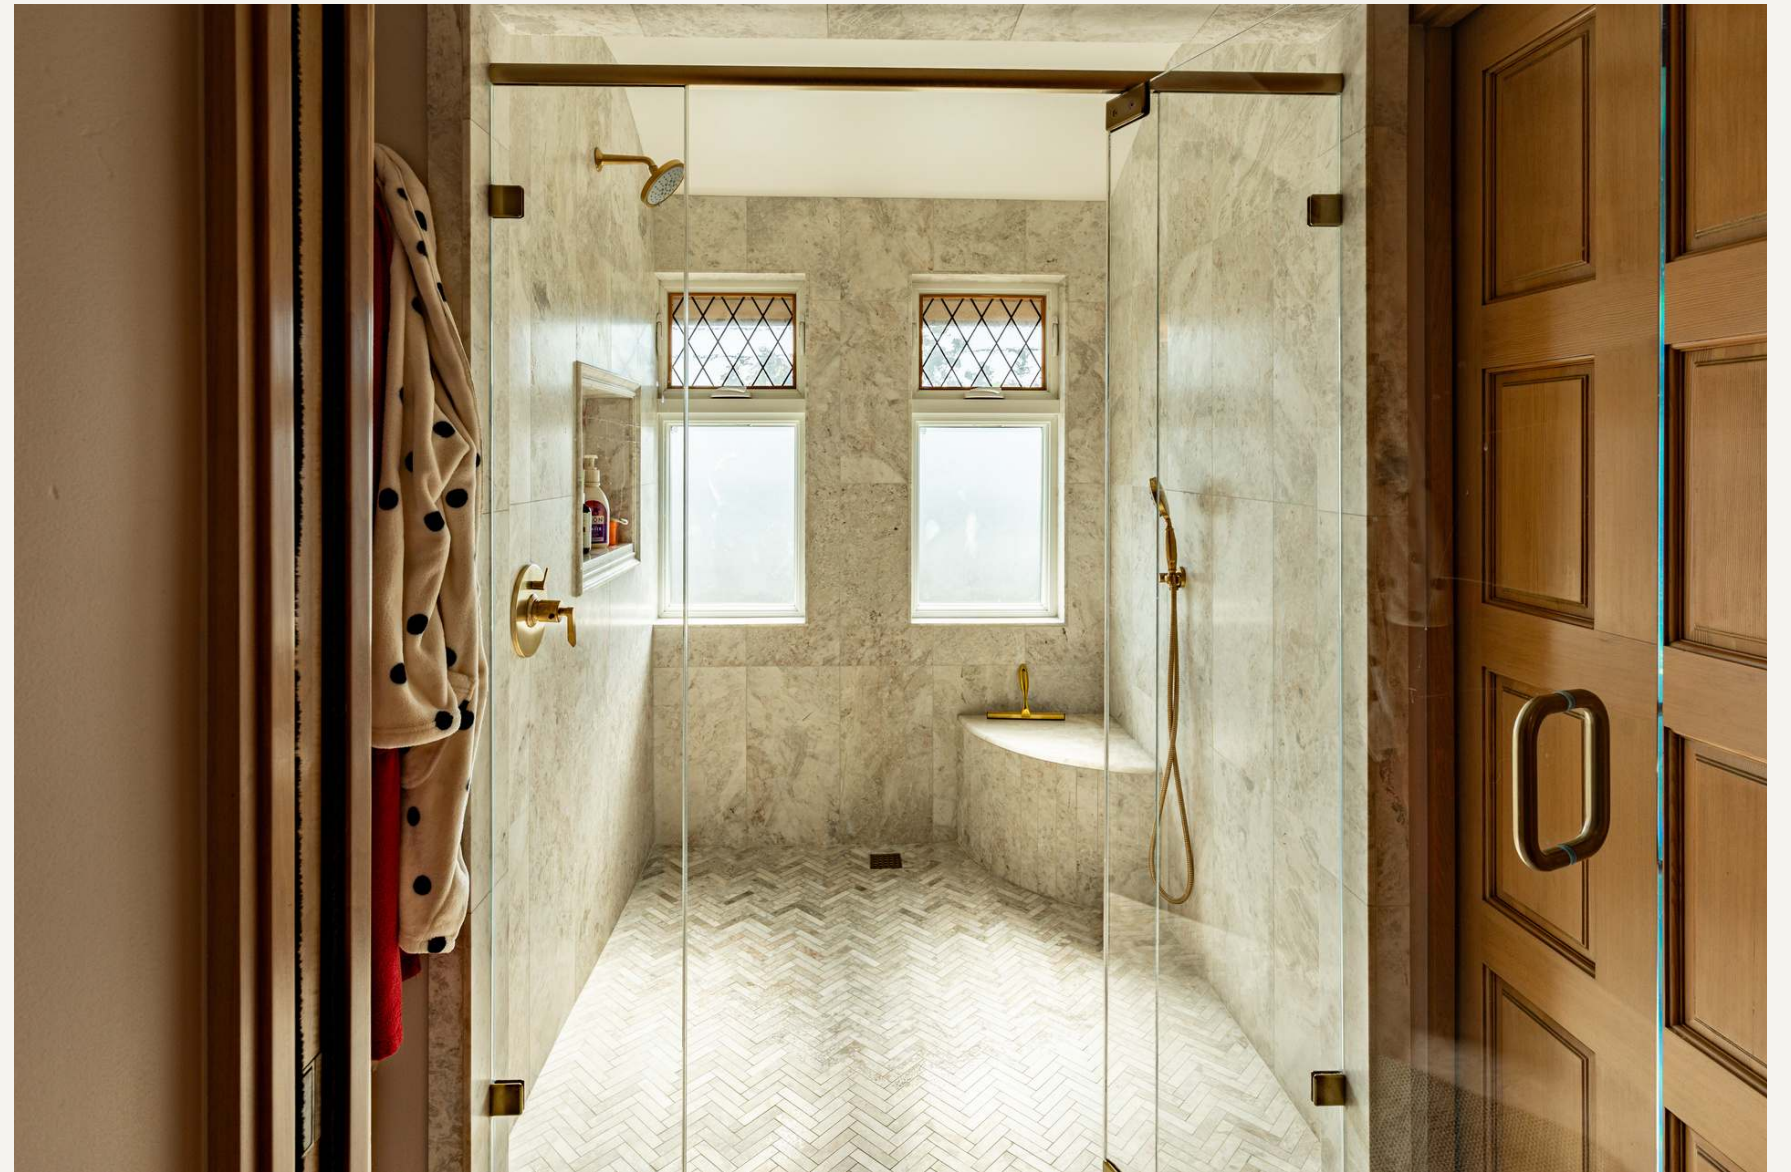

WHOLE-HOME REMODEL & EXTERIOR RESTORATION

PROJECT II · SELECTED VIEWS

# Coronado *Cottage*

A full-scale remodel of a historically sensitive Coronado residence restored the exterior with period-correct detailing while reconfiguring the interior for modern family living. The project required careful coordination with Coronado's design review process and a layered material palette that honored the home's original character without feeling like a museum piece. Every room was opened up, refinished, and rewired by the KSH team.

PROJECT III — FEATURED

JAMUL, CA

# Equestrian *Estate*

New Construction Home and property transformation

# Equestrian *Estate*

What started as a run down horse ranch was redeveloped into the perfect retirement estate. A brand new home was built overlooking the property, utilizing fire resistant materials such as metal roofing and hardie siding to protect from wild fires. The home was air sealed and heavily insulated to make it comfortable even in the worst summers.

The property was also improved with a new ADU, multiple pump houses for power and water needs throughout the property, and a large solar array and Tesla power wall system to provide constant power even in local outages.

With great planning and care, this home is the perfect place to enjoy retirement and family.

PROJECT IV — FEATURED

RANCHO SANTA FE, CA

# Fairway *Haven*

LUXURY WHOLE-HOME REMODEL

PROJECT IV · SELECTED VIEWS

# Fairway *Haven*

A refined, whole-home reimagining for a family who entertains often — kitchen, primary suite, and living spaces reworked as one continuous environment with warmer woods, tailored built-ins, and a material palette confident without being loud. The project involved extensive structural work to open up the floorplan and add a loft, paired with all-new high-end finishes throughout. Structural, finish, and MEP scopes were carried by KSH end-to-end.

PROJECT V — FEATURED

# Serenity *In Stone*

BATHROOM REMODEL

CORONADO, CA

PROJECT VI

SOLANA BEACH, CA

# Solana *Kitchen & Bar*

KITCHEN & BAR REMODEL

# Solana *Kitchen & Bar*

KITCHEN & BAR REMODEL · SOLANA BEACH, CA

A full kitchen and bar transformation in Solana Beach, executed in close collaboration with a San Diego Interior Designer. The project centered on a two-tone cabinetry palette, a hand-carved limestone hood, custom encaustic tile, and a backlit onyx bar panel built to the designer's exact specification. Every material was sourced and installed as drawn, with KSH carrying structural, finish, and MEP scopes on a single schedule.

PROJECT VII

Point Loma, CA

# Point Loma Paradise

LUXURY WHOLE-HOME REMODEL

# Q & A

*We are excited to begin  
crafting your home together!*
