

KSH CONSTRUCTION

EST. 2009 · SAN DIEGO

SELECTED WORKS & CLIENT HANDBOOK

Timeless Luxury, Masterfully Crafted.

A curated look at our recent coastal builds — and
the standards that guide every project we take on.

Builders of bespoke San Diego homes.

KSH Construction is a San Diego-based luxury general contractor specializing in custom new builds and high-end whole-home remodels — from Coronado to Rancho Santa Fe, La Jolla to La Mesa.

KSH Construction is a General Contractor in San Diego, California that specializes in residential new construction and whole-home remodels. Founded in 2009 by San Diego native Kyle Harrell, KSH has spent more than fifteen years crafting homes that balance architectural ambition with the day-to-day livability our clients expect.

We strive for excellence in everything we do — communication, customer service, knowledge of the construction process, building science, and our ability to problem-solve alongside our clients, architects, and trade partners. Every project is assigned a dedicated Project Manager, Site Supervisor, and Client Coordinator. Our carpenters and electricians are in-house, not subcontracted — one team, one home, start to finish.

I.

Project Manager

Controls the overall project — schedule, finances, purchasing, and planning. Works with the design team to limit surprises.

II.

Site Supervisor

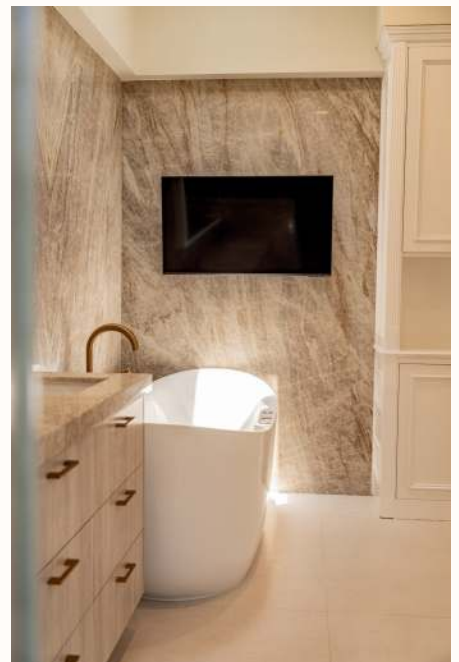

Runs the jobsite. Oversees the crew, coordinates trades, and holds the standards on material, workmanship, and cleanliness.

III.

Client Coordinator

Your dedicated point of contact from discovery to handover. Owns the day-to-day communication and getting answers from the team.

Project Overviews

PROJECT I — FEATURED

Coronado Skyline View

WHOLE-HOME REMODEL · CORONADO, CA

A complete transformation of a waterfront home, reimagined around an open great room anchored by a marble-topped island and exposed reclaimed beams overhead. The project involved significant structural work — reopening the main living span, re-routing mechanicals, and rebuilding the kitchen and living volumes as one continuous architectural gesture. Executed in close collaboration with the client's architect and interior designer; framing, finish carpentry, and electrical all carried by the in-house KSH crew on a single schedule.

Coronado Skyline View

CORONADO, CA

PROJECT II

PROJECT II — FEATURED

Coronado Cottage

WHOLE-HOME REMODEL & EXTERIOR RESTORATION · CORONADO, CA

A full-scope remodel of a historically-sensitive Coronado residence — exterior restored with period-correct detailing while the interior was fully reconfigured for a modern family. The project required careful coordination with Coronado's design review and a layered material palette that honors the home's original character without feeling like a museum piece. Every room was opened up, re-finished, and re-wired by the KSH team.

Coronado Cottage

RANCHO SANTA FE, CA

PROJECT III

PROJECT III — FEATURED

Fairway Haven

LUXURY WHOLE-HOME REMODEL · RANCHO SANTA FE, CA

A refined, whole-home reimagining for a family who entertains often — kitchen, primary suite, and living spaces reworked as one continuous environment with warmer woods, tailored built-ins, and a material palette confident without being loud. The project involved extensive structural work to open up the floorplan and add a loft, paired with all-new high-end finishes throughout. Structural, finish, and MEP scopes were carried by KSH end-to-end.

Fairway Haven

SAN DIEGO COUNTY

PROJECT IV

PROJECT IV — FEATURED

The Gallery House

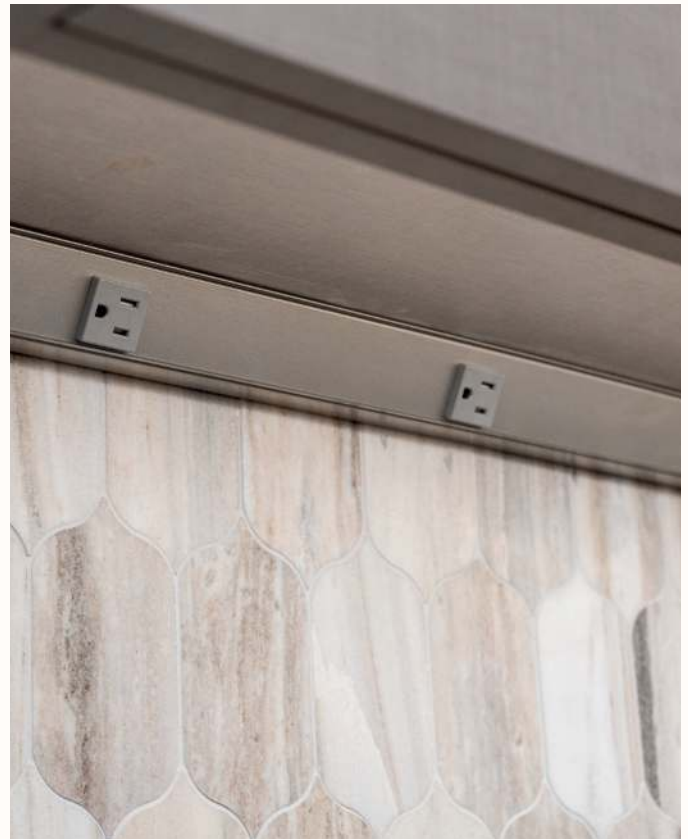

WHOLE-HOME REMODEL · SAN DIEGO COUNTY

A gallery-quality whole-home remodel built around clean lines, considered material moments, and a quiet luxury palette. Custom millwork, marble counters, and hex-tiled feature walls were specified and installed in close coordination with the design team. Every surface was sourced and detailed to read calm at first glance and reveal craft on the second — structural, finish, and MEP scopes carried by KSH from start to finish.

PROJECT V — FEATURED

Vista Azul

WHOLE-HOME REMODEL · COASTAL SAN DIEGO

A coastal-modern whole-home remodel designed around ocean light. Clean lines, deep overhangs, and floor-to-ceiling glazing blur the threshold between inside and out. The project required close collaboration with the architect on structural moments that had to stay invisible — including a concealed steel spine that opens the living-room span without a single visible column. Every surface was specified for coastal durability without surrendering the softness that makes a house feel like a home.

SAN DIEGO COUNTY

PROJECT VI

PROJECT VI — FEATURED

Serenity In Stone

PRIMARY SUITE & BATH — WHOLE-HOME REMODEL · SAN DIEGO COUNTY

A primary suite and bath built around the veining of a single natural stone — book-matched and run wall to wall so the material itself does the quieting. Part of a larger whole-home remodel, the room combines custom millwork, brass fixtures, and concealed lighting specified and installed to highlight the stone without competing with it. The result is a room that reads calm on entry and rewards you on every return.

The KSH process — three phases, one team.

Each project is unique and requires its own tailored approach. What never changes is the process that delivers it — detailed planning, close collaboration with your architect and designer, and a dedicated KSH team from first walk through final handover.

I.

Pre-Construction

The most successful projects are the ones with thorough planning. Pre-construction is where we evaluate materials, systems, budget, and decisions — alongside your architect, designer, and our trade partners. The KSH team builds out the proposal with detailed scope, selections, and schedule before a single wall is touched. No surprises.

II.

Construction

Your dedicated Project Manager becomes your main point of contact. We hold our trade partners to the same high standards we hold ourselves. The jobsite stays clean, organized, and secure. Every detail is installed and reviewed by the same in-house team that began the project.

III.

Post-Construction & Home Care

A final walkthrough and punch list completed to your standard. Every KSH home is backed by a 1-year workmanship warranty, plus a return visit at the 11-month mark. For clients who want long-term peace of mind, our Home Care Program coordinates yearly maintenance with the same trades that built the home.

| We build what others say can't be built. The impossible is our starting point — not our limit.

You'll hear from us often.

Construction should not be a guessing game. We run every project on a single cadence so you always know where we are, what's next, and what needs your input.

01

Construction Management Platform

Every active project is run on Job Tread. You get your own login to see schedules, documents, photos, selections, and progress in real time — the same information our team sees.

02

Daily Logs

At the end of every jobsite day, our site supervisor posts a log with photos and a short summary of the work completed. You'll know exactly what happened on your home, without having to ask.

03

Weekly Email Update

Every week, your Client Coordinator sends a written update covering the past week, a two-week look-ahead, and a short list of action items — things we need from you to keep the schedule intact.

04

Bi-Weekly Meetings

Every other week we meet — in person on-site or by Zoom — to walk the project with you. We cover details, open RFIs, upcoming selections, and anything on your mind. Our team comes prepared.

Communication isn't a deliverable. It's the whole project.

BEGIN YOUR BUILD

Let's build something worth keeping.

If you're planning a custom home or a whole-home remodel in the San Diego area, we'd love to hear about it. Every engagement begins with a discovery call — no pressure, no templates, just a conversation about what you're trying to build.

SCAN TO BEGIN

Tell us about the home you're planning. A quick intake, a real conversation.
